CAT.5E Booted Unshielded (UTP) Ethernet Network Patch Cable Black

CAT.5E Booted Unshielded (UTP) Ethernet Network Patch Cable Black is an upgraded version of Cat5 unshielded twisted pair cable, also known as Cat5 cable. UTP, this is currently the most common and basic method of cable construction, consisting of pairs of wires twisted together. There is no shielding, instead the symmetrical twist in the wires create a balanced transmission line, helping to reduce electrical noise and EMI. In addition, the different twist rates of each pair can be used to reduce crosstalk. This is a copper patch cable with superior performance and widely used in network connections, which can meet the data transmission needs in modern network environments. We Supply CAT5E, CAT6, CAT6A, CAT7, & CAT8 Ethernet Patch Cables.These cables come pre-terminated with RJ45 connectors and ready to go.
