Product Description

30AWG Cat.8 F/FTP Ethernet Network Cable 40Gbps 2000Mhz RJ45 Patch Cord

This Cat8 Ethernet cable consists of a RJ45 male on one end and a RJ45 male on the other. It is typically used for Ethernet network connections such as patch panels, switches, computers and routers. The shielding helps protect against electro-magnetic (EMI) and radio frequency interference (RFI).

100% Pure Copper

This cables is manufactured using high quality pure bare copper to ensure optimal performance and longest lifetime.

50 Micron Gold Plated Connectors

This non-corrosive, thickest available gold plating delivers optimum conductivity and maintains a stable signal connection with little risk of getting damaged over time.

Double Shielded

Foil shield on individual pairs plus overall braid is optimal for interference prone areas, and shielded RJ45 connectors offer enhanced isolation.

CAT8 Channel Test

Our cables are 100% tested to pass a CAT8 channel test, and come with a printed test report.
